Enabling Growth

Patra allows USI to manage growth without adding staff or asking existing staff to take on larger workloads. Account managers now focus on customer relationships, retention and service, and as a result, USI has seen growth with existing clients through account rounding, cross-selling and higher retention rates.

Supporting Time Management

Patra specializes in providing tailored services to insurance brokerages, ensuring solutions are specific to established business processes. This gives USI account managers the ability to plan their days with confidence, knowing that work will be done on time and with reduced errors.

Delivering Quality and Security

USI values Patra's E&O coverage and U.S.-based quality assurance team, which reduce their exposure to risk. Patra's dedicated USI Process Executives work in three shifts, providing 24-hour support, and allowing USI account managers to see work in real-time, over a secure network.
