

# Innovating the Certificate Delivery Process

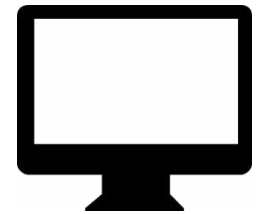

**Making certificate processing and delivery more flexible, convenient, and efficient.**

Applying robotic data extraction to ensure certificate information is accurately uploaded in CertVault.

Blockchain applied to ensure authenticity and secure certificate storage.

24/7 user access to view and distribute certificates via desktop and mobile.

Status confirmation of viewed certificates.

Email alert notifications

---

CertVault is a cloud-based certificate repository, providing instant access to certificates of insurance for brokers, holders, insureds, and carriers. The all-in-one digital platform is specifically designed to streamline certificate processing and issuance, enhancing the customer experience, reducing cost, improving operational efficiency, and eliminating delivery risks inherent in today's print and mail process.
